

## **Research project into bereavement support**

Brainbox Research is a health and social research organisation currently undertaking research for Elliot's footprint. Elliot's Footprint is a charity dedicated to ensuring that families have the support they need in the aftermath of losing a child.

We are asking for parents and families who are willing to talk about their experience of bereavement support. The aim of the project is to improve bereavement services for families who have experienced the sudden death of a child so we want to understand the thoughts, feelings and experiences of bereaved families in and around Leeds. The findings will guide future strategy for Elliot's Footprint to ensure they are doing the right thing to achieve better outcomes for grieving parents and families.

If you feel that you could talk about your recent experience and provide feedback that would help the charity to understand the strengths and weaknesses of the current bereavement support services please get in touch with Dr Fiona Fylan by calling 0113 238 0157 or emailing her assistant on [amanda.jewell@brainboxresearch.com](mailto:amanda.jewell@brainboxresearch.com)

Many thanks for considering taking part.
